Print Standard Data Form

1. SITE IDENTIFICATION

1.1 Type

[Back to top](#)

A

1.2 Site code

GR1430009

1.3 Site name

NISIDES ASPRONISOS, ARGKOS, MARAGKOS, REPI, TSOUGKRIA, TSOUGKRIAKI KAI THALASSIA
PERIOCHI NISON SKIATHOU KAI SKOPELOU

1.4 First Compilation date

2016-12

1.5 Update date

2020-07

1.6 Respondent:

Name/Organisation:	Υπουργείο Περιβάλλοντος και Ενέργειας
Address:	
Email:	

1.7 Site indication and designation / classification dates

Date site classified as SPA:	No information provided
National legal reference of SPA designation	JMD HP 37338/1807/E103/6-9-2010 (OJ 1495 B)

2. SITE LOCATION

2.1 Site-centre location [decimal degrees]:

[Back to top](#)

Longitude:	23.591530
Latitude:	39.117839

2.2 Area [ha]

20479.4000

2.3 Marine area [%]

98.9800

2.4 Sitelength [km] (optional):

No information provided

2.5 Administrative region code and name

NUTS level 2 code	Region Name
GR14	Thessalia

2.6 Biogeographical Region(s)

Mediterranean	(0.00 %)	Marine Mediterranean	(0.00 %)
---------------	----------	----------------------	----------

3. ECOLOGICAL INFORMATION

3.1 Habitat types present on the site and assessment for them

[Back to top](#)

No habitat types are reported for the site

3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive 92/43/EEC and site evaluation for them

Species				Population in the site						Site assessment				
G	Code	Scientific Name	S	NP	T	Size		Unit	Cat.	D.qual.	A B C D		A B C	
						Min	Max				Pop.	Con.	Iso.	Glo.
B	A392	Phalacrocorax aristotelis desmarestii			r	26	26	p		G				
B	A392	Phalacrocorax aristotelis desmarestii			c	186	307	i		G				

Group: A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles

S: in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

NP: in case that a species is no longer present in the site enter: x (optional)

Type: p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

Unit: i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))

Abundance categories (Cat.): C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information

Data quality: G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

3.3 Other important species of flora and fauna (optional)

No information provided

4. SITE DESCRIPTION

4.1 General site character

[Back to top](#)

Habitat class	% Cover
Total Habitat Cover	0

Other Site Characteristics

The proposed site Includes the marine area surrounding Skiathos Island, coastal waters along the western coast of Skopelos Island from Cape Gourouni in the north to Cape Myti in the south and the entire marine area within the Strait of Skopelos, between Skopelos and Skiathos. The area contains a 0.5 n.m. marine extension along the entire included coastline of Skiathos, Skopelos and nearby Islets.

4.2 Quality and importance

The site is important for the breeding and non-breeding populations of the Mediterranean Shag. The number of individuals increases during the post-breeding season, indicating immigration from other sites, probably from the eastern part of the Northern Sporades around Alonnisos Island. Mediterranean Shags forage in coastal waters along the shore of Skiathos and west Skopelos, as well as in the Strait of Skopelos. During recent years an Audouin's Gull colony has been established on one of the uninhabited Islets of Skiathos. Associated foraging areas, located in the eastern part of the site, are also used during the post-breeding period.

4.3 Threats, pressures and activities with impacts on the site

The most important impacts and activities with high effect on the site

No information provided

4.4 Ownership (optional)

No information provided

4.5 Documentation (optional)

Fric, J., Portolou, D., Manolopoulos, A. and T. Kastritis (2012). Important Areas for Seabirds in Greece. LIFE07 NAT/GR/000285 - Hellenic Ornithological Society (HOS / BirdLife Greece), Athens.

5. SITE PROTECTION STATUS

No information provided

[Back to top](#)

6. SITE MANAGEMENT

6.1 Body(ies) responsible for the site management:

[Back to top](#)

No information provided

6.2 Management Plan(s):

An actual management plan does exist:

<input type="checkbox"/>	Yes	
<input type="checkbox"/>	No, but in preparation	
<input checked="" type="checkbox"/>	No	

6.3 Conservation measures (optional)

No information provided

7. MAP OF THE SITE
